

ONYX PosterShop HP EDITION

The professional printer solution for HP

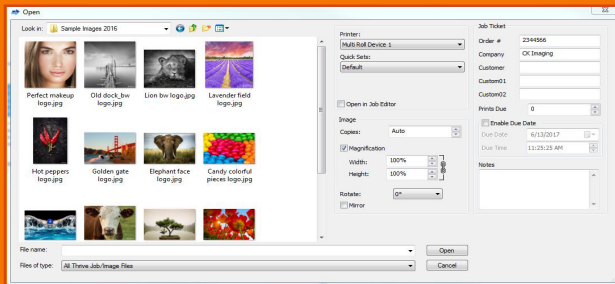

ONYX PosterShop HP Edition is seamlessly integrated to support all HP printers and print applications including soft-signage and textile. With 2X faster RIP speeds and 5X faster production speeds than other solutions, ONYX is the only solution for serious printers.

ONYX software brings unrivaled performance that can improve your profitability by as much as 30%.

- The industry's first solution with the new Adobe PDF Print Engine 5.1
- First to market with compatibility for PDF 2.0 features
- 2X faster RIP speeds and 5X faster production speeds
- Increase profitability up to 30% with just one more print job per day
- Full 64-bit platform
- 16-Bit image processing for superior output

ONYX

"The technology built into ONYX 18.5, coupled with Adobe PDF Print Engine 5.1, demonstrates that Onyx Graphics is committed to building state-of-the-art workflow solutions...and raises the bar for the entire wide-format print segment."

- Mark Lewicki, Senior Product Manager, Adobe.

Print right the first time with new dynamic tools for all wide-format print applications.

- Integrated inksavings up to 30% with GCR+
- Swatch Books to easily match color requests
- Colorways for patterns on textile print applications
- Step and Repeat for high volume printing and decals
- Industry leading color for soft-signage and textile
- One-click set up of print applications to automate prepress
- Automated print-and-cut workflows to increase production
- Job thumbnails & nesting previews to see jobs before printing
- Automatically add bleed, grommets & cut lines to print jobs
